Educational Qualifications/Achievements

Third Level B.Sc (Honours) Computing in Multimedia Systems/Web Engineering

2008-2009 Dun Laoghaire Institute of Art, Design and Technology

Final Year Subjects:

- Advanced Web Design
- Mobile Computing
- Usability and Information Systems
- Multimedia Systems
- Media Technology

Final Year Project: Developed blogs in CakePHP and Ruby on Rails to illustrate the advantages and disadvantages of using frameworks to create web applications.

2005-2008 **B.Sc in Computing in Multimedia Programming**
Dun Laoghaire Institute of Art, Design and Technology

Final Year Subjects:

- Database Management Systems
- Object Oriented Programming
- Computer Networks
- Multimedia Programming
- Digital Media Entrepreneurship

Final Year Project: Developed a football prediction website using Ruby on Rails.

Skills Profile

- Programming Javascript, C#, Actionscript, HTML, HAML, SASS, CSS, Ruby on Rails, PHP
- Design Tools Director, Flash, Photoshop, gimp, 960 grid system, Dreamweaver, rubymine, bootstrap
- Databases MySQL
- Operating Systems Windows, Linux, Mac OS

Final Year Project B.Sc (Honours)

Final Year Project For my final year project I developed two blogs; one developed using Ruby on Rails and the other using CakePHP. I incorporated Prototype in CakePHP and JQuery in Ruby on Rails to gain some experience in both JavaScript libraries.

Final Year Project B.Sc

Final Year Project For my third year project in IADT, my teammate and I created a social networking website with a built-in football prediction game using Ruby on Rails. The website provided users with the ability to register, create and customise their home pages, leave comments for other users, join a league, participate in the weekly football prediction game and more. Users would predict the outcome of a set of fixtures from the upcoming season in the English Premier League and be compared against a friend in their league. If they had more correct predictions than their rival, they would receive 3 points. The same correct predictions would receive 1 point and less correct predictions would receive 0 points.
