

Gearóid Garvey

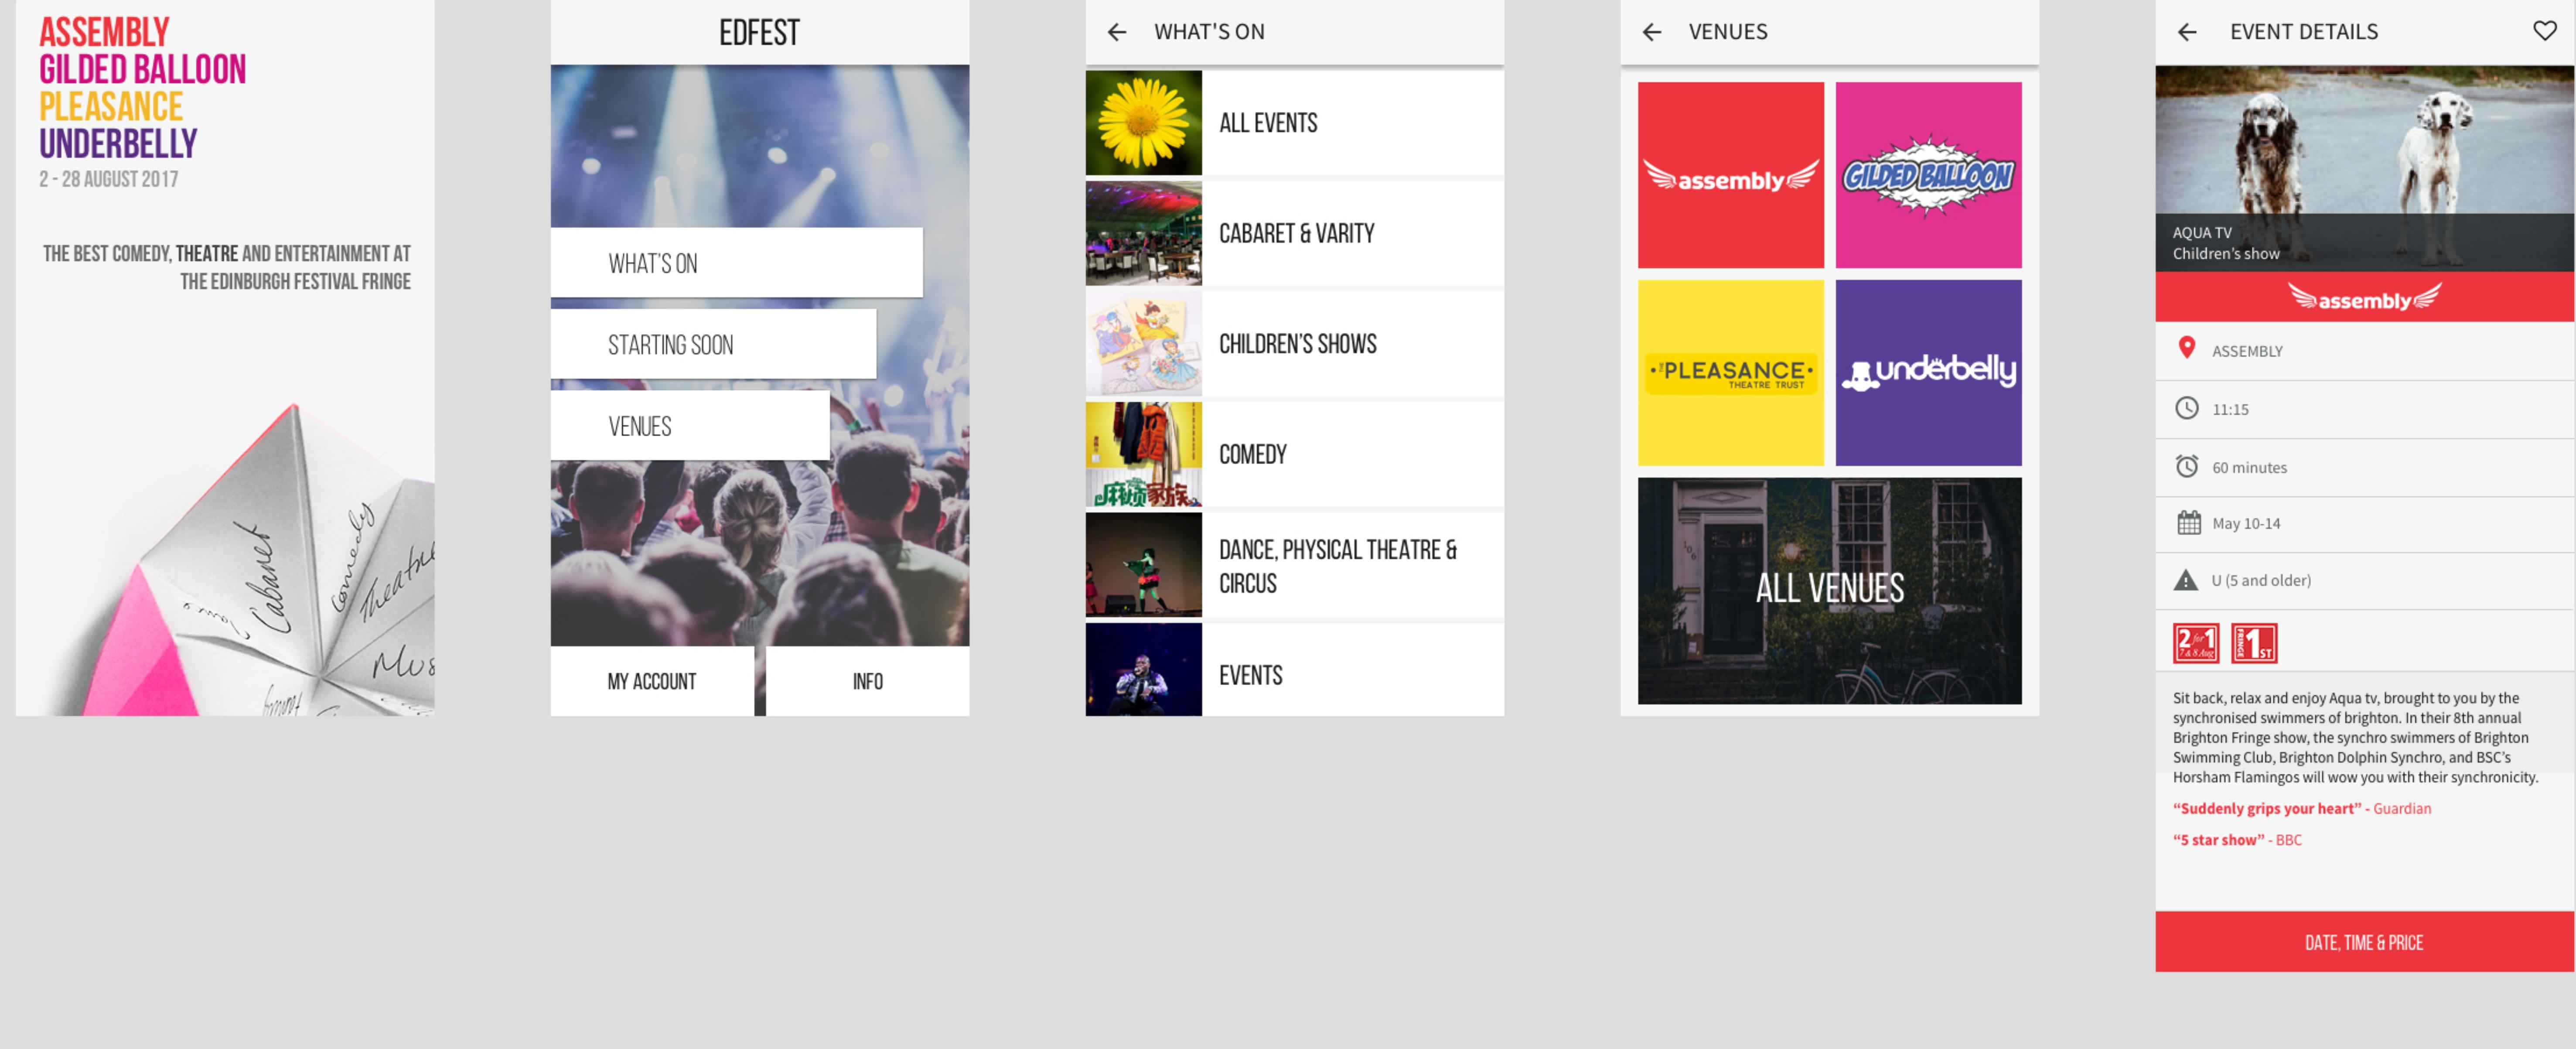

UX / UI Designer

Project: Edfest

Role: UX / UI

Summary: This is a mobile application to search and book events at the 'Big Four' venues of the Edinburgh Fringe Festival. It is available to download on iTunes and Google Play store.

Design considerations: It was necessary to represent the four separate stakeholders equally within the design, incorporating the unique branding of each venue with careful balance. It was built using React Native which is one code base for iOS and Android.

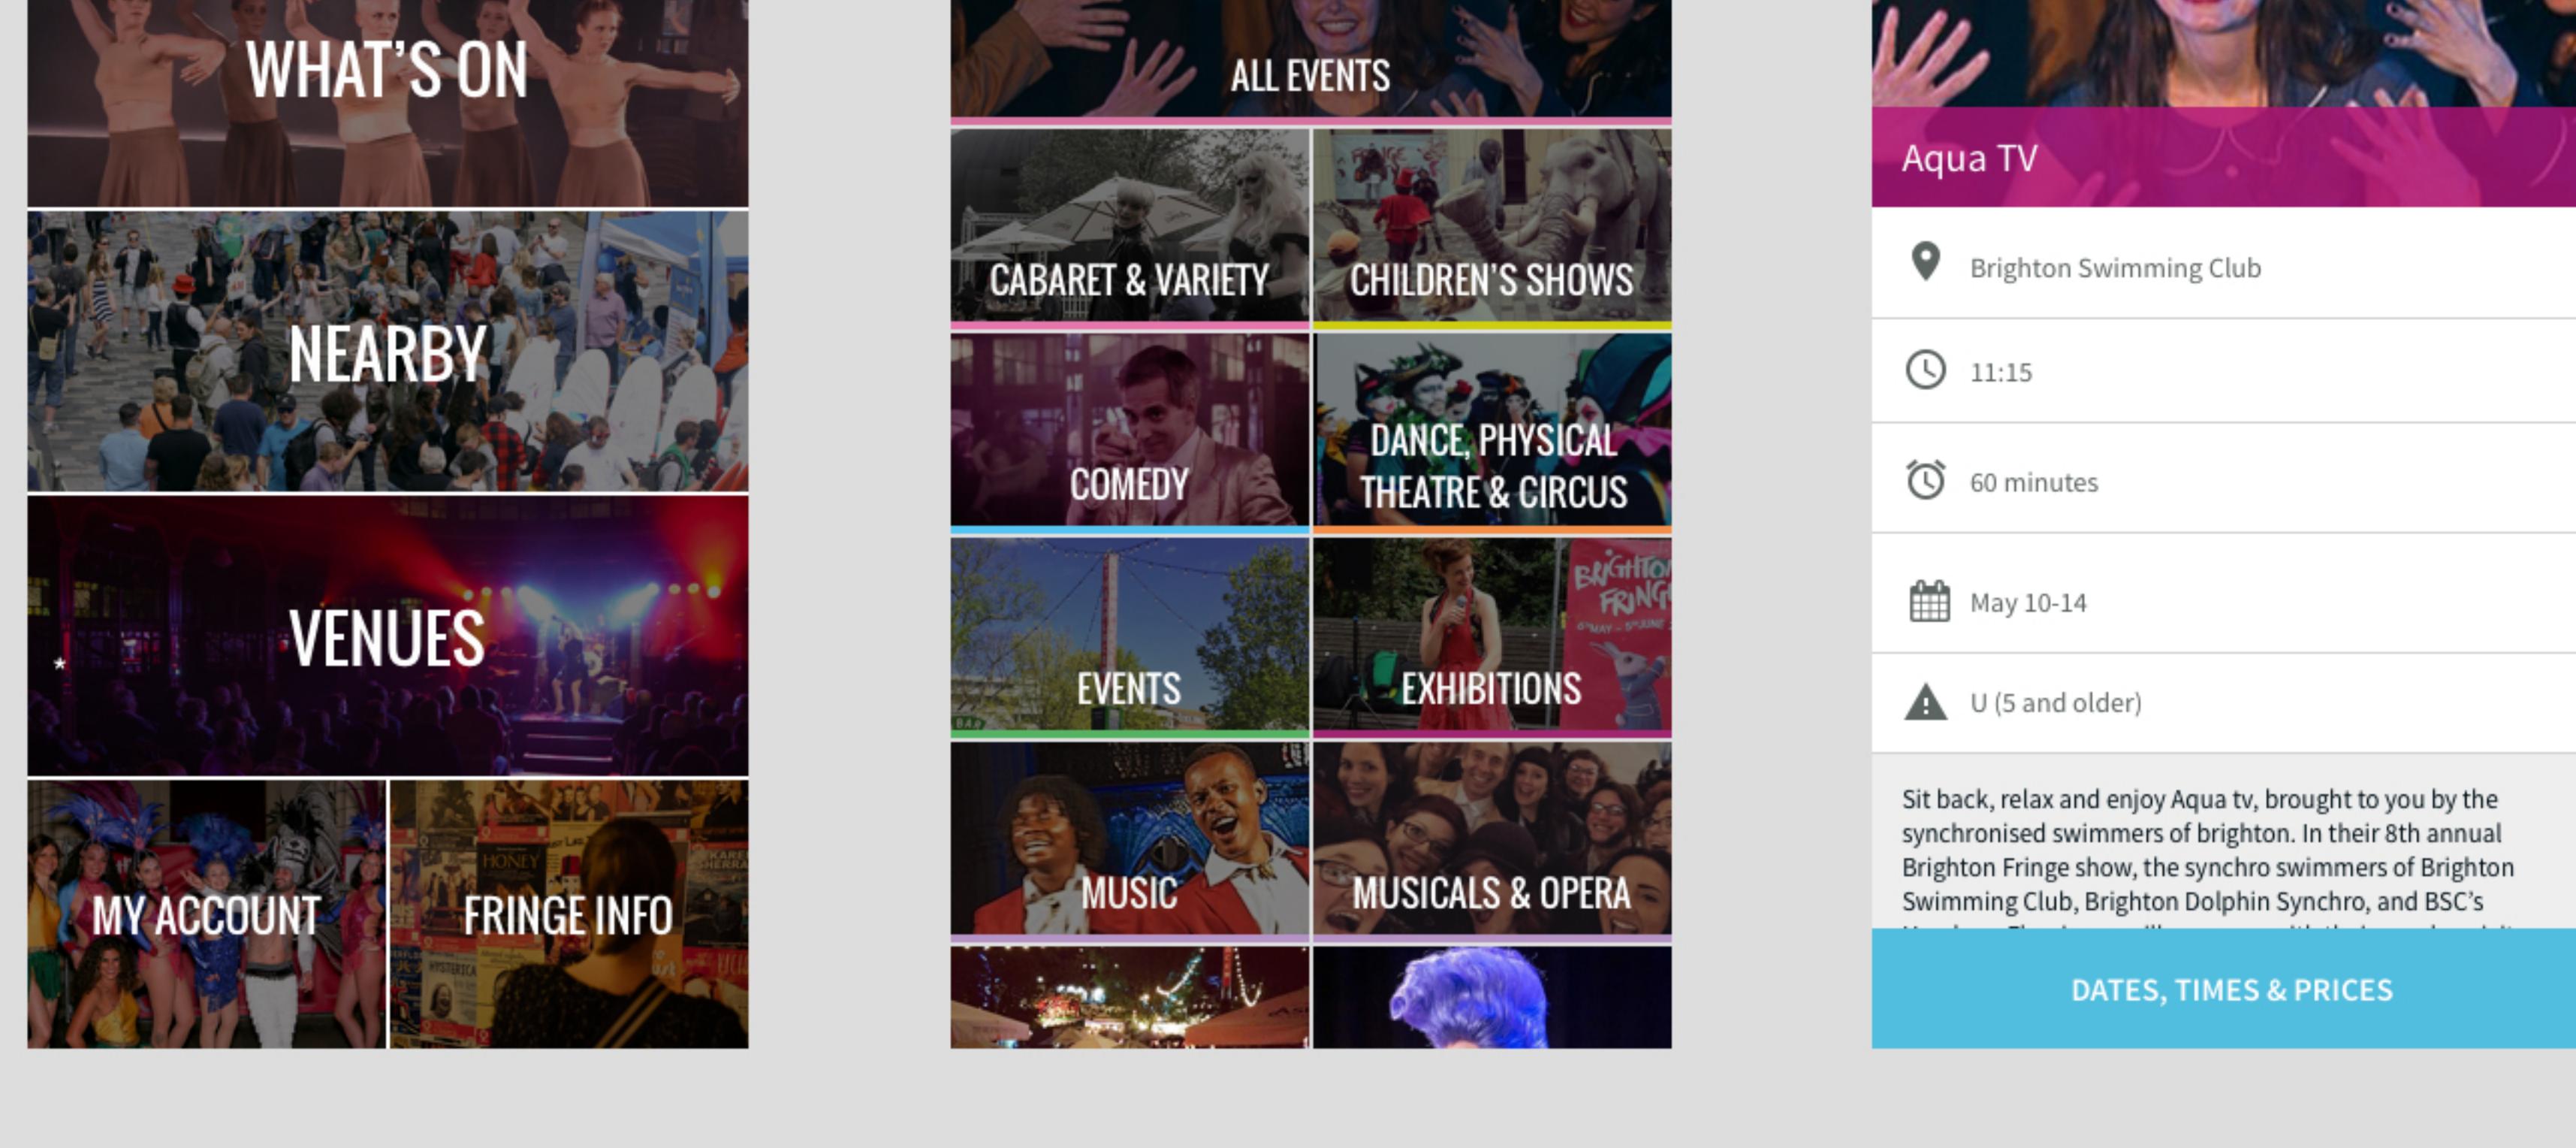

Project: Brighton Fringe Festival

Role: UX / UI

Summary: This is a mobile application to search and book events at Brighton Fringe Festival. It is available to download on iTunes and Google Play store.

Design considerations: The project had a short design and development sprint before Fringe 2017. The application was built using React Native.

Project: wethrive

Role: UX / UI

Summary: This application is to encourage staff engagement and motivation using surveys. I was tasked with designing an easy to understand interface to manage people added to the system.

The image shows a screenshot of the wethrive web application. The header includes the logo and navigation links: 'People', 'Surveys', 'Reports', 'Analysis', 'Export', and icons for help, settings, and export. The main section is titled 'Manage People' and displays a table of staff members. The table columns are: Name, Email, Team, Location, Department, Unit, and Status. The table rows include: Adam Apple (Designer, Brighton, Unassigned, Unit 1, Active), Tom Turnip (Developer, Galway, Unassigned, Unit 1, Active), Fred Fries (Project Manager, Brighton, Unassigned, Unit 1, Active), and Poppy Pumpkin (Developer, Brighton, Unassigned, Unit 1, Active). At the bottom of the table are buttons for 'Save or cancel' and 'Delete Person'. Navigation buttons 'Prev', '1', and 'Next' are also present. The footer contains copyright information: 'Copyright 2016 We Thrive Ltd - Terms of Service - Legal disclaimer' and the wethrive logo.

Project: WireCompare

Role: UX consultant

Summary: A website to compare International money transfers. My role was to review and critique the website from a user experience perspective. I designed a separate landing page to demonstrate suggested improvements to the design.

The image shows a screenshot of the WireCompare website. The header features the logo 'WireCompare' and the tagline 'The cheapest and fairest Way to Compare Money Transfers'. It includes links for 'What we do', 'Support', 'Contact us', and a language selector for 'English'. The main content area has a banner: 'SAVE 85% ON YOUR INTERNATIONAL MONEY TRANSFER THE CHEAPEST AND FAIREST WAY TO COMPARE MONEY TRANSFERS'. Below the banner is a form to 'Send Money From' (Germany (EUR)) and 'To' (USA (USD)). To the right is a 'COMPARE DEALS' button and a 'TRUSTPILOT' rating of 4 stars. At the bottom left are three numbered steps: 1. Tell us how much you want to send and the destination of the money transfer, 2. We analyze and compare the best money transfer systems, and 3. Return the cheapest and fairest way to send money. There is also a 'TRUSTPILOT' rating of 4 stars.
